

Referral to Placement Process

The Local Survey Committee (LSC) meets to review all referrals for the gifted program. All information is reviewed carefully. Students who meet referral criteria for giftedness (see detailed information in the “Frequently Asked Questions” – FAQ packet) will receive a letter asking for parents to come to the Special Services Office to give written permission for these students to be individually tested for the gifted program. Once the district receives the results of the individual testing, the LSC follows district and state policy. Students who score at or above the 91st percentile will be ruled eligible. If students meet the emerging potential for gifted populations as outlines in the FAQ document, they will be given further consideration.
